MANUAL button on the main control panel. If the workclamp position is changed in the NC mode other than MANUAL, the workclamp position may not be read in the next automatic operation, causing the workclamp to be punched. Position the workclamps as far apart as possible and check the "dead zone". 3. Checking tools and station numbers Example:

PROGRAMMING MANUAL - Used AMADA

The various options make SheetWorks a flexible tool. For instance, sheet metal sequences can be batch processed and automatically saved on the AMADA AP100 SSD server. The Unfold-Manager can fully automatically analyze, process, convert and save an unlimited number of 3D models (STEP, IGES, SWG).

We currently export a DXF file for our AP100 Amada software that works with our Amada lasers. Ck2 Save File Editing Tools.What we are noticing is that whenever the dxf is brought into AP100, the dxf file comes in with a ton of small segments when dealing with a curve or ellipse.

Amada Ap100 Software - apalinho.netlify.com

So my hunch is that the Amada software is converting your file to R12 type entities. But that is a complete guess. If I've misunderstood, and you're seeing lines instead of arcs in AutoCAD then that negates the thoughts about Amada and the R12 DXF. I hope this helps. Best of luck to you in all of your Inventor pursuits, Curtis
