administrators and catalog managers, a task-based approach to performing day-to-day administrative functions. Tasks are grouped logically into predefined workspaces, and access to workspaces and tasks is based on user permissions.

Welcome to Ariba Buyer Administrator

A user with the Administrator role can create a role with certain permissions and assign the role to a buyer user. A role defines a user function within Ariba Network, such as Purchase Order Generator. Each role has a unique name and set of associated permissions that specify what users who are assigned to the role can see and do in Ariba Network. A role can be assigned to any number of users.
