Cisco's CGv6 (Carrier Grade IPv6)solution helps customer transitioning from IPv4 to IPv6 gradually, maintaining business continuity. VSM (Virtualized Services Module)on ASR9K is a Service Card which provides different CGv6 Applications. This is the next generation Service Card after ISM (Integrated Services Module).

ASR9000/XR CGv6 on VSM: CGN / NAT44 Deployment Guide - Cisco

Cisco's CGv6 (Carrier Grade IPv6)solution helps customer transitioning from IPv4 to IPv6 gradually, maintaining business continuity. ISM (Integrated Services Module)on ASR9K is a Service Card which provides different CGv6 Applications.

CGv6 on ISM: CGN / NAT44 Deployment Guide - Cisco Community

SIP Traffic in CRS-3 Carrier Grade NAT (CGN) with PAT Hi Rodolfo, yes, SIP can be used with no issue through CGN system without the need of any particular ALG if SBC performs media-latching.

Solved: SIP Traffic in CRS-3 Carrier Grade NAT... - Cisco ...

I'm in the process of building out a project for work and need some input since I've never worked on this type of level. We connect customers to different services and the IPs assigned from those services are all over the 10.0.0.0/8 subnet and almost randomly assigned to us. Using the 10.0.0.0/8 space has proven difficult with conflicts on our customers end and we need a fix.

RFC 6598 - Carrier Grade NAT. How to Automate? : networking

This chapter describes the commands used to configure and use the Carrier Grade IPv6 (CGv6). To use commands of this module, you must be in a user group associated with a task gro
