### Fibula Free Flap Rui Fernandes - gamma-ic.com

The fibula free flap (FFF) has become a widely accepted autologous reconstructive option for segmental mandibular defects after resections for cancer, benign tumors, trauma, or osteonecrosis. Advantages of this flap include the ability to repair soft-tissue composite defects, excellent bone length that can be shaped to fit the anatomical need, vascularized bone that resists resorption, suitability for dental implant placement and so allowing dental rehabilitation, and finally the ability to ...
