Reviewed in the United States on July 27, 2016. In Naturalizing Badiou, Gironi stages a highly fascinating encounter with Badiou. According to Gironi, Badiou's entire project is beset by a fundamental ambiguity, namely, that of an unresolved tension rooted in the ontico-ontological difference. In Gironi's own words, "the relationship between the ontological and the empirical is the most intractable issue engendered by Badiou's system".

Badiou again turns here to mathematics and set theory - Badiou's language of ontology - to study the possibility of an indiscernible element existing extrinsically to the situation of ontology. He employs the strategy of the mathematician Paul J. Cohen, using what are called the conditions of sets. These conditions are thought of in terms of domination, a domination being that which defines a set.
